

## PRESS TEXT

### **Giulia Fly - GODDESS MATERIAL - The new song Video out now**

Zurich, February 19, 2019

The new single will be released on YouTube on 22 February 2019.

It is one of the forerunners of the first album that will be released in November: the new song GODDESS MATERIAL by Giulia Fly. A song that once again shows the talent of the Caucasian singer.

The beat is sexy as usual, melodic and underlaid with dreamy erotic yet danceable rhythms and melodies, so that the song will surely find its way into the hottest playlists. Joy of life and good mood paired with lyrics that describe the old game between man and woman and the exciting feelings of the first contact.

She is in love, confused and enthusiastic. The video scenery moves in a bar where neither champagne nor caviar should be missing. The video to GODDESS MATERIAL is a beautiful science fiction romance after Giulia was created and brought to life by her doctor, played by a well-known Zurich doctor and professor.
